Objective

With a true passion for life and a commitment to excellence, I'm Hasan, a DevOps Engineer and Full Stack Developer with a degree in Telecommunication and Communication Engineering. I approach every project with creativity, enthusiasm, and a drive to innovate. Beyond work, my passion for iceboarding and basketball reflects the positive energy and vibrant spirit I bring to everything I do. I'm excited to tackle new challenges, collaborate with like-minded people, and contribute my skills to projects that truly make a difference. Let's connect and explore new opportunities together!

Experience

- **Naffco**

2021/OCT - Up to now

Full stack web developer

#DevOps

- Leverage expertise in DevOps methodologies.
- Utilize Docker for containerization and orchestration.
- Implement Jenkins for continuous integration and deployment.
- Utilize GitHub for version control and collaboration.
- Automate processes to enhance efficiency.
- Foster collaboration between development and operations teams.
- Drive innovation and improve system reliability.
- Contribute to faster time-to-market and higher-quality software releases.
- Support company growth and competitive advantage.

#Backend Development:

- Building server-side logic using Node.js, magento and laravel frameworks.
- Designing and implementing RESTful APIs to facilitate communication between frontend and backend systems.
- Managing databases and writing efficient SQL queries for data retrieval and manipulation.
- Handling authentication and authorization mechanisms to ensure data security.

#Frontend Development:

- Designing and developing responsive web interfaces using HTML5, CSS3, and JavaScript.
 - Implementing user-friendly features and animations to enhance user experience.
- Collaborating with UI/UX designers to ensure ● seamless integration of design elements.
Optimizing web applications for maximum speed and scalability.

#SEO

- Conducted keyword research and on-page optimization.
- Implemented off-page strategies for link building.
- Conducted technical SEO audits and resolved issues.
- Developed SEO-friendly content strategies.
- Tracked performance using Google Analytics.
- Proficient in various SEO tools.
- Improved conversion rates through optimization.
- Communicated effectively with clients/stakeholders.

#Project Management:

- Participating in project planning and scoping sessions to define requirements and timelines.
- Breaking down tasks and estimating time needed for development.
- Tracking progress and reporting updates to stakeholders.
- Collaborating with cross-functional teams including designers, QA engineers, and product managers.

#Problem Solving and Troubleshooting:

- Identifying and resolving technical issues and bugs in a timely manner.
- Conducting thorough testing and debugging to ensure the quality of code.
- Implementing effective solutions to improve performance and user experience.

- **Developers for syria**

2018/sep - 2021/JUN

Web developer /laravel/wordpress

Laravel:

#Backend Development:

- Building robust web applications using Laravel framework.
- Designing and implementing RESTful APIs for seamless frontend-backend communication.
- Integrating third-party services and libraries to extend application functionality.
- Developing custom middleware and authentication mechanisms for data security.

#Database Management:

- Designing database schemas and optimizing queries for performance.
- Implementing Eloquent ORM for easy database interactions and relationships.
- Utilizing migration and seeding for database versioning and data population.
- Implementing caching mechanisms to improve application speed and scalability.

#Task Scheduling and Queues:

- Setting up task scheduling for automated tasks using Laravel's Scheduler.
- Implementing queues and workers for asynchronous processing of tasks.
- Optimizing queue configurations for efficient resource utilization and workload management

WordPress:

#Theme Development:

- Creating custom WordPress themes from scratch using HTML, CSS, and PHP.
- Integrating responsive design principles to ensure compatibility across devices.
- Customizing themes and templates to meet client specifications and branding guidelines.
- Implementing child themes for easy maintenance and future updates.

#Content Management:

- Setting up and configuring WordPress CMS for content creation and management.
- Training clients on how to use WordPress admin interface for content updates.
- Implementing custom post types, taxonomies, and meta fields for flexible content organization.
- Optimizing website performance by leveraging caching and content delivery networks (CDNs).

- **Engineers Syndicate/Hana for constructions**

2018/FEB - 2021/JUN

ELV / Design and Estimation engineer

I worked as estimation engineer in constructions office for Ms,Hana daroish / AleepoEngineers
Syndicate /Aleepo/syria
And My work priorities was

*Prepared and presented technical documentation such as , fire alarms and terrestrial internet networks.

- **Freelancer**

2017 - 2021

Wordpress developer . Ui/Ux designer

- Designed and developed custom WordPress websites tailored to clients' needs and specifications.
- Customized WordPress themes and integrated plugins to enhance website functionality and aesthetics.
- Conducted thorough client consultations to gather requirements and translate them into detailed wireframes and mockups.
- Created visually engaging user interfaces (UI) that prioritize usability and seamless navigation, following best practices in user experience (UX) design.

- Effectively managed multiple projects concurrently, maintaining strict adherence to deadlines and delivering high-quality results.
- Actively sought client feedback to iteratively refine and improve design and development processes, fostering long-term client relationships and satisfaction.

Education

Course / Degree	School / University	Grade / Score	Year
Communication engineering	Faculty of Electronic and Electrical Engineering/ Aleppo university	72.20	11-may-2017
Web technolgies	Svu	Passed all classes with score 75(didn't pass theGraduation Project)	2021
Ccna	Students union/ Allepo university	Participated	2018
ELV Engineer rank course	AleppoEngineers Syndicate	Participated	2021
Full stack developement (mern) Bootcamp	Udemy	Participated	2023
Ultimat DevOps Bootcamp	Udemy	Participated	2023
Seo	Udemy	Participated	2023

Skills

- Leadership spirit
- Problem solving
- Html , css , js .php
- Wordpress
- network management (switchig and routing)
- Website maintenance
- Laravel

- Sql , workbench
- Mongo Db
- Next.js,Express.js ,react ,
- Seo
- CI/CD .Jenkins
- cloud computing . AWS, Azure
- containerization technology . Docker

Projects

- **My biggest projects**

- **Naffco web site**

Contributed to the development and maintenance of the NAFFCO website, a Magento-based e-commerce platform catering to the fire protection industry. Responsibilities included frontend and backend development, theme customization, and plugin integration to enhance user experience and streamline business operations. Successfully implemented features such as product catalogs, online ordering systems, and customer account management functionalities. Collaborated with cross-functional teams to meet project requirements and deadlines, ensuring the website's scalability, security, and performance.

[Www.naffco.com](http://www.naffco.com)

- **Shield Global website**

Led the development of the Shield Global website using WordPress with Elementor and WooCommerce integration. Responsibilities encompassed creating custom designs, implementing responsive layouts, and optimizing user interfaces for seamless navigation. Leveraged WooCommerce for e-commerce functionality, including product listings, shopping cart management, and secure payment gateways. Collaborated closely with the design team to translate mockups into interactive web elements, ensuring brand consistency and visual appeal. Successfully delivered a user-friendly website that effectively showcased Shield Global's products and services while driving online sales and customer engagement.

[Www.shieldglobal.com](http://www.shieldglobal.com)

- **Laravel-Based Web Application for Naffco Company's Intersec 24 Presentation**

As an employee of Naffco, played a key role in the design and development of a comprehensive web application using Laravel, tailored specifically for showcasing and managing the company's products for presentation at Intersec. The application facilitated efficient fetching of product details and enabled authorized users to add new products with relevant information through an intuitive dashboard interface.

Technologies Used:

Laravel PHP Framework
HTML5, CSS3, JavaScript
MySQL Database
Git Version Control

- **Tigre rosa website**
- **Kamira website**
- **Naffco Fire truck website**
- **Naffco aviation**
